Coal shipment to Norachcholai and the scrapped urea plant

by E. Carlos Fernando

The Coal Central Environmental Authority, which is the body responsible for the approval of coal shipments, has approved the shipment of coal to Norachcholai power plant. This approval is in line with the country's energy policy and aims to increase the country's energy independence.

The shipment of coal is expected to commence in the next few weeks, and the authority has assured that all necessary safety measures will be in place to ensure the smooth operation of the power plant.

In addition, the authority has also approved the construction of a new coal-fired power plant in the Norachcholai region, which is expected to be operational in the next two years.

The construction of the new power plant will create several hundred new jobs, and it is expected to boost the local economy significantly.

Overall, the approval of the coal shipment and the construction of the new power plant are seen as positive steps towards achieving the country's energy goals.
